

Terry Griffin
Final Project
COMP.5230 Computer Vision I
Spring 2018
May 3, 2018

The github repository for this project can be found at
<https://github.com/TerryGriffin/COMP.5230Project.git>

The directory structure is as follows:

```
root
|
+ doc - The project documents, including the final report and the survey paper.
|
+ docsrc - The source for the documents
|
+ images - The images used in the documents
|
+ src      - The source code
|
|   + include - Header files used by the project
|   |
|   + lung_segmentation - The lung segmentation application
|   |
|   + compute_iou - An application for computing the intersection over union and
|   |               other statistics for evaluating the segmentation performance
|   |
|   + extractslice - An application for extracting one slice from a CT scan
|   |
|   + mhdinfo - An application for printing the size and scaling information for
|               a CT scan
```
